```
Inventory 24 June 1980

Device:              Type          Remarks

Video Terminal       VT100-AB

Printronix           P300          Lineprinter

Decwriter II         LA36-DJ

Disk Unit            RL01-A

Floppy Unit          RX02-BD

Disk Unit            PMDD/B

Dectape              TD8-EM        Simple Dectape

Dectape II           TU58-XA

Computer             8A400-BR      16K core, 12slot, KM8-AA, 240V

        Processor    KK8-A
        I/O Option   DKC8-AA       12bit, serial, panel
        Ext. Option  KM8A-YB       Memory extension, powerfail, bootstrap
        Core memory  MM8-AB        16K memory
        Memory man.  DM8E30        Multi-8

Computer             8A400-BR      16K core, 12slot, KM8-AA, 240V

        Disk cntrl   RL8A-0-1
        TTY Cntrl    M8650         TTL logic
        Floppy cntrl M8357         Rx01 floppy
        Dectape cntrl M868         TD8E simple Dectape
        RK05 cntrl   M7104,M7105,M7105

These two computers were connected together.

MOS Memory           M&S C8020     64K words

Memory Management    KT8-A         128K words memory extension

Disk unit            Rk05J
